

The Warren Work Bench

...loaded with benefits for you

Galvanized drawers ride on heavy duty ball bearing slides. Drawers may be subdivided for tools and other items for your ideal organization.

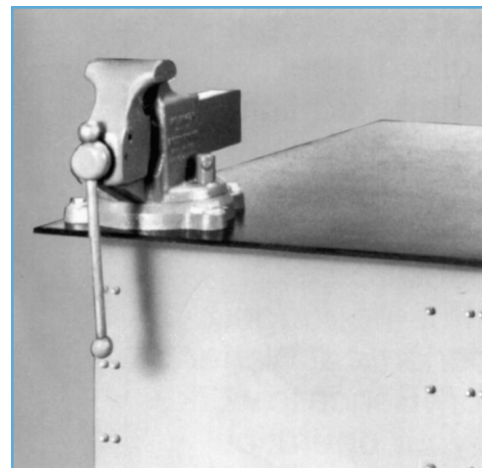

Individual drawers can handle loads up to 200 lbs. and are available in 4", 8" or 12" heights.

Hinged drawer guard makes the Warren Work Bench easy for you to lock.

Does whatever you need — wherever you need it — and holds up to a ton!
That's heavy duty!

Ideal for mounting a vise, light machine tool and work station equipment. Goes to where your work is.

Introducing

The Warren Work Bench

Mobile, versatile and
designed for heavy
duty industrial service.

The Warren Work Bench improves productivity by providing a sure, solid work surface and better organizational capabilities for your tools and parts. Designed and built for heavy duty use, the unit has an overall capacity of 2,000 lbs. Individual drawers can handle up to 200 lb. loads.

Top surface is 5/16" steel plate, body is cold rolled 16 gauge steel, and drawers are 14 gauge galvanized steel. Standard finish is green enamel. Other colors are available upon your special order. Put the rugged, economical Warren Work Bench to work in your operation.
